Meet Our Adoptable Manatees

BLUE SPRING MANATEES

ANNIE: Rescued as an orphaned calf and released back to the wild in 2008, Annie is not shy and is quite popular with park visitors.

AQUA: First sighted at Blue Spring in December 2011, Aqua has since been a regular visitor. She has two known calves.

BRUTUS: One of the largest manatees, Brutus weighs in at almost 1,800 pounds and has been a regular since 1970.

DEEP DENT: A medium-sized male who first arrived at Blue Spring in 1979, Deep Dent gets his name from a deep, "dent-like" propeller wound on his tail.

DOC: Returning to Blue Spring every winter since 1976, Doc is nearly ten feet in length and is frequently spotted at the park in the summer.

ELAINE: Born at Blue Spring in 1985, Elaine is playful and has been known to get into mischief!

FLASH: A large male manatee first identified in 1977, Flash is shy and will take off in a "flash" when disturbed.

FLOYD: Born in the summer of 1978, Floyd is easily identified by an old injury that left him with only half a tail.

GATOR: First identified in 2011, Gator got his name when he was spotted on the webcam playing with an alligator.

HOWIE: A large male known to winter at the park since 1971, Howie once tipped over the research canoe – with the researchers in it!

LENNY: Born in 1978, Lenny winters at Blue Spring each year. He prefers rest to all other activities.

LILY: One of the few adult females to regularly winter at the park, Lily has returned each year since 1974 and is the mother of several calves.

LUCILLE: Born in 1980, Lucille had her first calf at an early age and became a grandmother in 1993.

MARGARITO: Margarito, the son of Lily, has returned to Blue Spring every winter. He can be identified by his missing left flipper.

MERLIN: Merlin has been wintering at the spring since 1970. His nickname is "Tail-End Charlie" since he often arrives late each year.

MOO SHOO: *Our newest adoptee!* First identified in 2010, Moo Shoo loves to nudge the research canoe and is very photogenic. She has had two calves.

NICK: His unusual behavior, such as traveling north when all the other manatees are heading south, has earned him the nickname "Crazy Nick."

PADDY DOYLE: Named after the famous "fighting Irishman," Paddy Doyle is one of the feistiest manatees in the Blue Spring area.

PHILIP: Born in the summer of 1982, Philip is playful and seems to love following the research canoe everywhere.

PHYLLIS: Phyllis is believed to have been born in 1985. In 1991, she gave birth to twins – a rare event for manatees. She is now the mother of several calves.

ROBIN: Born on April 15, 1980, Robin is one of the few manatees with a recorded birth date because his mother was being monitored by researchers at the time of his birth.

ROCKET: Rescued as a tiny orphan in 2006, Rocket is small for a male but it only makes him that much faster!

UNA: Rescued as an orphan in 2003, Una was released and gave birth to several calves. She was rescued again in 2017 due to fishing line wrapped around both flippers and is now doing well in the wild.

WHISKERS: Born to Dana in 1996, Whiskers is an exceptionally curious manatee and ventured away from his mother at a very young age.

EAST COAST MANATEES

CHESSIE: First sighted in the Chesapeake Bay in Maryland in July, 1994, he has been known to travel along the southeast coast of the U.S.

HOMOSASSA SPRINGS MANATEES

ARIEL: Just two weeks old when she was rescued with her mom, Amanda, Ariel is a regular at the manatee education programs.

BETSY: Betsy is very friendly and curious and is quick to investigate anything new. In 2017 she returned from Ohio's Cincinnati Zoo, where she served as a companion for manatees in rehabilitation.

ELECTRA: Rescued in 1998 after a boat strike and entanglement, Electra is the smallest and youngest manatee living at the park.

LORELEI (in memoriam): Born in 1975, Lorelei was the first manatee born and raised in captivity and was the mother to 3 calves. She passed away peacefully on April 23, 2018.

SOUTHWEST FLORIDA MANATEES

ELSIE: Easily identified by her tail, which was badly injured by a boat propeller, Elsie frequents the Fort Myers and Tampa areas.

FLICKER: A female first documented in the winter of 1983, Flicker's name comes from her many small propeller scars that resemble flickering flames.

GINGER: Known for spending summers in the Marco Island area, Ginger has two known calves – one is named Ale!

JEMP: Rescued in July 1995 after being exposed to red tide, Jemp travels in a wide range along Florida's west coast.

VECTOR: A traveling manatee who has been tracked as far north as the Suwannee River and as far south as the Peace River.

ALABAMA MANATEES

BAMA: The first manatee ever captured and tagged in Alabama waters. Bama migrates from Alabama to Crystal River, Florida, each winter.

Save the Manatee® Club is a 501c(3) non-profit. Donations are tax-deductible. The value of membership benefits fall within current gift substantiation laws and do not reduce tax deductions. **Save the Manatee Club does not share, sell, or publish our donors' names or addresses.**
