Practical Scars
As of April
2019

Size (Small, Medium, Large)

I.D. No. (BS5 or Blue Spring 5)

Year first I.D.'d 70 = Blue Spring 1970

BB9 = Born 1989

Animals that cannot be reI.D.'d (unscarred) are dropped from the scarsheet at seasons end.

Animals that can be recognized are kept on a 3-5 year drop. Sightings anywhere count.

The "Practical Scar Sheet" uses a 2 to 3 year drop and tries to show only scars visible at a distance from the shore. Animals with no such marks are left off.

The "Practical Scar Sheet" is alphabetical.
